50X1-HUM

The treatment of malignant tumors seems to be very impersonal. The physicians at the Institute of Oncology, Academy of Medical Sciences USSR do not hesitate to experiment with various methods of therapy. A group of patients suffering from a given type of malignant tumor may be arbitrarily treated by one method to the exclusion of all others, in order that the various methods can be compared and evaluated. This results in interesting statistics, but a calculable number of fatalities.

Radical measures are taken in some instances to prevent metastasis, i.e., in all cases of malignant tumors of the lower lip, the submaxillary regional lymph glands are removed immediately after the original tumor has been removed, and before the patient is allowed to leave the hospital, because, "once the patient has been discharged it is difficult to get him back in the hospital, for further treatment."

Each chapter is followed by a bibliography. The text is well illustrated by sketches and photographs, and much of the information is summarized in the form of charts and graphs.

All the chapter authors are affiliated with the Institute of Oncology of the Academy of Medical Sciences USSR. They all appear in CIA/CD 1, May 1952 (SECRET), except Professors A. I. Rakov, A. A. K'yandskiy, I. N. Shapiro, Candidate of Medical Sciences A. V. Afanas'yeva, and Stomatologist M. K. Kostomarova.

The inscription in the front of the book reads: "To the Highly Respected A. Brunswick in token of friendship from one of the authors of this book. Prof A. I. Rakov. Sao Paulo. 29 July 54."

Table of Contents of Zlokachestvennye Opukholi

| | <u>Page</u> |
|--|-------------|
| Preface | 3 |
| I. Malignant Tumors of the Skin, by Prof A. P. Chanin | 5 |
| II. Cancer of the Lower Lip, by Prof A. I. Rakov | 89 |
| III. Malignant Tumors of the Cranial Bones, by Prof N. N. Petrov | 127 |
| IV. Malignant Tumors of the Brain, by Prof A. L. Polenov* and Prof I. S. Babchin | 141 |
| V. Malignant Tumors of the Walls of the Orbit and the Defense Apparatus of the Eye, by Prof N. N. Petrov | 213 |
| VI. Malignant Tumors of the Eye, Prof A. A. Kolen | 235 |
| VII. Malignant Tumors of the Upper Jaw, by A. V. Afanas'yeva, Candidate of Medical Sciences | 266 |
| VIII. Malignant Tumors of the Lower Jaw, by Prof A. A. K'yandskiy and Stomatologist M. K. Kostomarova | 307 |
| IX. Malignant Tumors of the Organs in the Oral Cavity, by Prof N. N. Petrov | 339 |
